

**MODEL
LOG****PEST MONITORING STATION LOCATION LOG**

INSTRUCTIONS: Use this log to keep track of the date, location, and results of your pest monitoring efforts (e.g., using sticky traps or glue boards). The log asks for the inspection date, trap number, location, the condition of the trap (whether any pests are present), the type and number of pests, damage or other evidence of pest activity, and pest management action required and any additional information. We've started it off with a few examples to show you how to fill out the form.
